Altima Mx Overview

Altima Mx: Value Through Visibility

The mission of Altima Mx is to deliver a broad range of innovative, value-add solutions and services to help IT and audio/video hardware manufacturers put their products in front of their target market. We have programs to cover just about every need and every budget. Whatever you need and whatever you choose, Altima Mx creates value for you.

Our Programs

Hardware Manufacturers Partnership Program (HMPP)

With HMPP, hardware manufacturers can have intelligent, world-class shapes and stencils of their products created absolutely free. These shapes are offered in NetZoom™, the industry-standard solution for professional network design and diagramming. Its compatibility with Visio®, AutoCAD® and other applications puts your products in front of hundreds of thousands of network designers, consultants and professionals around the world.

Manufacturer Certified Stencils (MCS)

MCS offers an end-to-end service that puts IT and A/V manufacturers in touch with a qualified audience. We create professional-grade stencils of your products, which you can offer as a free resource to prospects around the world, directly from your corporate website. Along with this distribution, MCS captures valuable information about prospects that are interested in your products, providing you instant, qualified leads.

Custom Stencil Program (CSP)

Through the Custom Stencil Program (CSP), Altima Mx provides a world-class service for IT and A/V manufacturers that need to provide professional-grade stencils of their products to internal and external customers. In addition to creating intelligent, high-quality shapes and stencils of their products, CSP gives manufacturers flexible ownership rights to use stencils in their corporate websites, tradeshow materials, technical manuals, product catalogs and other sales, marketing and technical collateral.

For More Information

To learn more about these programs, contact an Altima Mx representative at 630.281.6464 or visit www.AltimaTech.com. We're ready to work for you.
